Made in Comunello
Made in Italy

A company with more than 50 years of manufacturing experience, a clear international vision based on the quality of our design, our groundbreaking technology, the solidity of our production, and our commitment to technical service and customer care.

The Comunello Group is built on a solid, reliable, well-structured manufacturing base. The group comprises 5 divisions in which all the products of each division are 100% designed and produced at company headquarters in Italy. This total control over manufacturing processes guarantees the highest levels of quality. Comunello was founded in 1965 and today exports to more than 110 countries worldwide.

A huge range of the finest products.

The Comunello **Gate Division** has built a reputation **in Italy and across the world** for providing the widest range of components for sliding gates and industrial doors of all weights and all sizes. Our vast range of

solutions and use of high quality materials including stainless steel and aluminium bring real value to a product offering which is truly unique and which delivers solutions for **all gate types**, whatever the size.

COMUNELLO**GATE**

The Rising Hinges opening system

PATENT
PENDING

- Opening system with inclined doors for sloping passages
- Adjustable leaf inclination
- Maximum slope up to 10 ° (~20%)
- For steel or aluminum leaves up to 3 meters
- To be welded or to be fixed versions available

202F-C

RISING HINGES is an innovative hinge system designed and developed for gates with sloping openings.

Thanks to suitably designed levers, the hinges allow an inclined

opening of the door. The alignment of the rotation axes of the upper and lower hinges is guaranteed by the ball joints complete with greasers for constant lubrication.

The Albatros bi-folding gate system

PATENT
PENDING

- Bi-folding wide opening swing gate system
- For double gates up to 16 metres wide
- Geared hinges for smooth opening
- Fold system occupies minimal space for opening and closing
- Trackless obstacle free entranceway

Connecting tube

ABS-16-G

With its patented revolutionary geared hinge the Albatros system offers a stable smooth opening for the biggest of bi-folding systems. This high quality precise system remains totally suspended and therefore trackless, allowing a clean obstacle free entranceway and

occupying half the space of a single leaf swing gate. The Albatros bi-folding power transmission arm is mounted on the underside of the first gate leaf and is connected to the lower geared hinge ensuring a space effective wide opening system.

The Ranger telescopic system does not use cables to transmit drive from one leaf to the next but instead it uses an innovative ground mounted rack track. This rack track transmits movement using a system of hidden pinions that connect to the side rack, motorising the next leaf.

The simplicity of the system ensures that it very easy and rapid to install, remains reliable and requires very low maintenance. The rack tracks are brushed clean on every opening by the two cleaning brushes installed on the front and back of each leaf.

- The pinion / rack coupling is completely protected inside the monorail housing, which guarantees **excellent protection** from ice blockage and atmospheric agents.
- Carriage with integrated pinion providing quick installation: simply **connect** the pinion to the sliding motor.
- Possibility to **adapt carriages** for use with actuators with different drive shafts, by using adapters.
- Suitable for temperatures ranging from -30° to 80° C.
- The monorails are manufactured from **high quality** steel profiles with a maximum thickness of 6 mm and are available in 3 and 6 m lengths in both galvanized and uncoated versions, depending on the different needs of the market and the installer.
- Protected moving parts for **clean aesthetics** and increased **safety** levels.

- **EASY AND FAST.** The ease of installing a single mono-carriage insures an extremely rapid operation.
- **ADJUSTABLE.** The mono-carriage is adjustable in length allowing for many different gate size and weight installations.
- **ALIGNEMENT.** The alignment between the wheel units is always perfect without guides or accessories.

Rising Hinges

*New RISING HINGES system for
environnements with slope*

 **COMUNELLOGATE**

Rising hinges to be fixed

The lower hinge has an adjustment system consisting of 4 holes both in the bracket fixed to the gate and in the bracket fixed to the pillar. Each pair of holes (1, 2, 3, 4) corresponds to an inclination of the door.

By adjusting the distance between the two hinges and adjusting the lower hinge, the desired inclination can be obtained.

Upper Rising hinge to be fixed

The leaf bracket is connected to the joint by means of an off-axis eccentric screw; the rotation of the joint allows a fine adjustment of the door, useful for placing it in a horizontal position and aligning it with the pillar.

The ball joint with grease nipple allows the door to tilt during movement

Lower Rising hinge to be fixed

The leaf bracket is connected to the joint by means of an off-axis eccentric screw; the rotation of the joint allows a fine adjustment of the door, useful for placing it in a horizontal position and aligning it with the pillar.

The ball joint with grease nipple allows the door to tilt during movement

Both brackets have 4 holes; each hole corresponds to a different inclination of the leaf in the open position.

Rising hinges to be welded

The lower hinge has an adjustment system consisting of 4 holes both in the bracket welded to the gate and in the bracket welded to the pillar. Each pair of holes (1, 2, 3, 4) corresponds to an inclination of the door. By adjusting the distance between the two hinges and adjusting the lower hinge, the desired inclination can be obtained.

Upper Rising hinge to be welded

The leaf bracket is connected to the joint by means of an off-axis eccentric screw; the rotation of the joint allows a fine adjustment of the door, useful for placing it in a horizontal position and aligning it with the pillar.

The ball joint with grease nipple allows the door to tilt during movement

Steel bracket for pillar fixing

Leaf bracket with insert to be welded in steel and aluminum versions.

Albatros

An innovative bi-folding swing gate system
offering maximum opening in confined spaces.

 **COMUNELLO****GATE**

The Albatros bi-folding gate system

Upper geared hinge

Lower geared hinge with power transmission arm

FEATURES

- ABS-100 is an ambidextrous kit
- The hinges with integrated mechanical gear ensure precise and stable transmission over time
- The kit is made of high quality materials particularly resistant to wear
- The mechanism with bearings and spherical joints significantly reduces friction and makes movement fluid
- The alignment of the leaves and the movement of the gate are easily adjustable by intervening directly on the bracket fixed to the pillar

Adjustable bracket

Ball joint with grease nipple

Adjustment for door alignment when opening

Adjustment for door alignment when closing

Grease nipple

Albatros **ABS-100-P** For leaves up to 4 m (quote A), A/H max = 3

GATE SYSTEM SIZING

$E = 2 \cdot T + B + 54$	OPEN GATE LEAF DIMENSIONS
$F = A - E$	NET OPENING SIZE WITH GATE OPEN
$G = L - 239 + B$	LEVER TUBE LENGTH
$L = (A - 50 - B) \div 2$	LEAF LENGTH
A	OPENING LENGTH
$B = 85 - (T/2)$	DISTANCE FROM THE LEAF TO COLUMN
T	LEAF TUBE SIZE

As indicated in the table, we recommend the use of tubulars of such dimensions as to make the structure sufficiently rigid and avoid bending of the doors during the opening and closing phases. It is also advisable to limit the weight of the gate as much as possible. The choice of the tubular may vary depending on the shape of the doors and of the materials used.

For weights (P) over 200 kg, contact COMUNELLO SERVICE DPT

Albatros **ABS-100-G** For leaves up to 8 m (quote A), A/H max = 3

GATE SYSTEM SIZING

$E = 2 \cdot T + B + 81$	OPEN GATE LEAF DIMENSIONS
$F = A - E$	NET OPENING SIZE WITH GATE OPEN
$G = L - 247 + B$	LEVER TUBE LENGTH
$L = (A - 75 - B) \div 2$	LEAF LENGTH
A	OPENING LENGTH
$B = 99 - (T/2)$	DISTANCE FROM THE LEAF TO COLUMN
T	LEAF TUBE SIZE

As indicated in the table, we recommend the use of tubulars of such dimensions as to make the structure sufficiently rigid and avoid bending of the doors during the opening and closing phases. It is also advisable to limit the weight of the gate as much as possible. The choice of the tubular may vary depending on the shape of the doors and of the materials used.

For lengths (A) over 4 m or weights (P) over 300 kg, contact COMUNELLO SERVICE DPT

Swing Gates Hardware

 **COMUNELLO****GATE**

Bearing hinges for square tubulars.

The durable die-cast aluminum cover has been designed to protect the hinge while giving a typical concealed hinge design

The adjustment slots allow you to adjust the height of the hinge even if the fixing hole has already been made.

Slot and adjustment screw allow the door to be raised and lowered to bring it into a horizontal position even after installation.

The insert with a ball bearing inside allows for a smooth and long-lasting movement

The insert is designed with a tapered roller bearing inside suitable for supporting axial loads due to the weight of the door.

Inserts available in versions for aluminum and steel gates

The knurling ensures a secure and stable fixing over time

Ranger

The Comunello telescopic system.
A perfect cableless mechanism
that maintains precision year after year.

 **COMUNELLO****GATE**

Ranger Components

Principle drive wheel for 2 or 3 leaf systems

The wheel sits on two external profiles of the track for a smoother movement.

Wheel unit made up of principle pinion drive wheel that, rolling on the rack track, generates the rotation of the external secondary pinion.

The movement via the second external pinion is transmitted to the rack mounted onto the side of the second gate leaf.

The rack track is equipped with two side guides on which the wheel sits. This is to ensure that the weight of the gate is not loaded on the racks teeth.

Movement is generated by the ground mounted rack that also functions as a track.

D = Wheel diameter
C = Internal width (wheel unit)
D1 = Pinion diameter
X = Minimum tube height

2 template guide kit for Rack Track installation

CODE	ART.	Box info	
		Pcs per pack	Kg
10131110 001	RG 10 P	1	6.4
10131101 001	RG 10 G	1	6.4

This alignment guide tools ensure a rapid and precise installation of the rack tracks that make up the 2 or 3 leaf telescopic system. The simple track is the first to be installed, from this reference the rack tracks are positioned in perfect parallel alignment using

two guide templates at a distance dictated by the tubular frame section of the gate. Thanks to the guide template the parallelism of the tracks is maintained and when two pieces of rack track are to be joined they will ensure the synchronization of the teeth.

The Rack Track installation templates are used to ensure a precise and parallel alignment of the tracks and rack tracks, and can be width regulated depending on the thickness of the tubular profile used in the construction of the gate.

When two pieces of rack track are to be joined, the precise position for the teeth can be achieved using the toothed element of the template guide which should be positioned on the joint where the two pieces of track meet.

2 template kit for wheel unit fixing

CODE	ART.	Box info	
		Pcs per pack	Kg
10131102 001	RG-20	1	0.9

1 Using the template mark the area to cut and drill

2 The tubular section is marked

3 Cut and drill the tubular section

4 Fix the drive wheel

Integrator

The all new cantilever system with
integrated transmission gears and
protected internal rack.

 **COMUNELLOGATE**

CGS-500.8P

FEATURES

- Noiseless bearings of new generation shielded to protect against dust suitable for temperatures from -30° C to + 80° C
- Self-balancing
- 8 support wheels for each carriage
- Longitudinal alignment on 16 wheels
- Central rotation stiffened pin

Mini

Monorail **CGS-345M**
+ Integrator pre-drilled rack **CG-50M**

For cantilever gates up to
7 m / 500 kg
INTEGRATOR MINI

For cantilever gates up to
16 m / 1200 kg
INTEGRATOR GRANDE
CGS-500.8G
ACTUATORS FORT
2500 230V - 3500 380V

The Integrator rack centering device

The Integrator centering guide quickly and simply centres the rack along its length by sliding in position inside the monorail. The central slot in the guide base holds the rack and the screw adjustment blocks everything in position so that the pre-drilled holes on the rack can be used as a guide for drilling into the monorail. When a second piece of rack is required just position the guide between the two pieces and tighten the blocking screw, this will perfectly align the teeth between the two racks.

Tightening knob that applies clamping pressure to block the rack in position.

Centering guide with rack centering channel.

1

Position the first piece of track inside the monorail.

The 2 template guides, one positioned at each end of the track, will centre the track lengthways within the monorail.

2

Using the pre-drilled rack as a guide drill fixing holes in the monorail.
Fix the rack to the monorail.

3

Insert the second piece of rack

4

Position the template guide between the two pieces of rack and by tightening the template guide the rack teeth are registered correctly.
Using the pre-drilled rack as a guide drill fixing holes in the monorail.

Bullet

Taking cantilever gates to new levels of simplicity,
these innovative mono carriages are the easiest
and fastest to install ever.

 **COMUNELLO****GATE**

The adjustable, precise, rapid installation mono carriage. Configuration made easy.

CGS-600.18

CGA-600.10
ALUMINIUM

5 nylon wheel carriage head with new generation silent sealed bearings

Space between gate and floor reduced to 75 mm for the MINI versions and 85 mm for the SMALL versions

Bullet mono-carriage	H mm
CGS-600.18 M	75
CGS-600.18 P	85
CGA-600.10 M	75
CGA-600.10 P	85

Internationally patented carriage body structure

9 Wheel carriage head with new generation silent sealed bearings

The disalignment between the four center wheels and the four external wheels allows the full load of the gate to be exchanged from the external wheels to the internal wheels when opening and closing

Thanks to the rotation pin the carriage is automatically balanced distributing the load between the wheels

Bullet. Simplified and precise installation

Select the required carriage length and simply position the mono carriage.

Cantilever Gates Hardware

 **COMUNELLO****GATE**

New series of 9-wheel trolleys for cantilever gates.
4.000 kg capacity, for openings up to **16 meters**

CGS-WB-350.9

FEATURES

- Monoblock steel body that ensure strenght to the structure
- Noiseless shielded bearings of new generation to protect against dust. Suitable for temperatures from -30 ° C to + 80 ° C
- Wheels positioned on 2 different levels in order to load the wheels alternately
- Alignment central wheel
- Thanks to central rotation pivot the carriages are self-balancing
- Adjustment screws for planarity
- Sturdy base with adjustment slots: the positioning adjustment is allowed even after installation

New carriage for heavy cantilever gates.
20.000 KG capacity, for openings up to **30 meters**

CGS-450.9-20K

FEATURES

- 35 mm thick monoblock steel body
- High capacity shielded bearing to ensure high load performance
- All components are made of high quality steel
- Alignment central wheel to ensure stability during movement
- Adjustment screws for planarity
- Very strong base with adjustable slots

CANTILEVER GATE SYSTEM

Wheels

150 SERIES

Kit for cantilever residential gates up to 6 meters and 600kg. Available in the "MINI" versions for gates up to 3m / 300kg and "PICCOLO" for gates up to 6m / 600kg.

CGS-150.5

CGA-150.5 — Aluminium

250 SERIES

Carriages with multiplate body for residential and industrial cantilever gates. 5-wheel and 8 wheels versions available in the "MINI", "PICCOLO", "GRANDE" sizes.

CGS-250.5

CGS-250.8

350/450 SERIES

Top series of Comunello with monobloc body for residential and industrial self-supporting gates. 5, 8 and 9 wheels versions available in the "MINI", "PICCOLO", "GRANDE" and "XL" sizes.

Piccolo

Grande

New generation shielded bearings suitable for extreme temperatures from -30 to + 80° c.

Monobloc steel body.

Alignment Central wheel

The positioning of the wheels on 2 different heights allows you to load the wheels alternately.

Adjustment screws for planarity.

The slots allow you to adjust the position of the trolley even after installing the anchors.

The central pin allows the trolley to rotate and adapt to the movement of the gate, the load is always evenly distributed on 4 wheels.

F1200

Single fixing with plug except for
tubular profiles (through hole)
Fixation simple avec bouchon pour
profils tubulaires (trou passant)
Montageset einseitig mit Stöpsel für
röhrenförmigen Profilen (durchgehendes Loch)
Fijación unificada única con tapa para
perfiles tubulares (orificio pasante)
Одинарный элемент крепления с
заглушкой для трубчатых профилей
(сквозное отверстие)

NOTES

A series of horizontal dotted lines for taking notes.

GENERAL TERMS OF SALE

1. GENERAL INFORMATION

1.1 This document is intended for customers (hereinafter "Customers") of FRATELLI COMUNELLO SPA (hereinafter simply COMUNELLO); its purpose is to inform customers about the contractual conditions that COMUNELLO shall apply in all the sales of its products (hereinafter GENERAL TERMS AND CONDITIONS OF SALE), unless otherwise agreed in writing, and which, in any case, are binding on and effective between the parties pursuant to art. 1341 of the Italian Civil Code.

1.2. COMUNELLO applies the Italian law in all contractual relationships involving the sale of its products, save for any specific derogations to be agreed and proved in writing.

1.3 The General Terms and Conditions of Sale listed here exclusively refer to products bearing the COMUNELLO trademark (hereinafter the "Products").

2. OFFERS – QUOTES

2.1 The offers made by COMUNELLO to its Customers are effective for a maximum period of 20 (twenty) days from their submission; in any case they will have to be formalized in writing, including by email.

2.2. Upon expiry of the aforementioned deadline, the offer made by COMUNELLO shall be deemed cancelled and not acceptable by the CUSTOMER, unless otherwise specifically agreed in writing between the contracting parties

3. ORDERS

3.1 Purchase orders signed by the Customers and addressed to Comunello must be confirmed using the specific form prepared by Comunello (order confirmation), which each Customer has to sign and return to Comunello, precisely specifying the quantity of the goods bought and any additional features of the requested products.

3.2 The purchase contract shall be considered finalized and binding on the parties by means of:

- a) confirmation of the purchase order by FRATELLI COMUNELLO SPA;
- b) physical execution of the purchase order by FRATELLI COMUNELLO SPA, provided it is in compliance with the contents of the sale entered into between the parties.

3.3 Any amendment or addition to the individual provisions of the General Terms and Conditions of Sale or to the purchase order shall be ineffective unless approved in writing by COMUNELLO SPA. In the event changes are made to the purchase order after sending the form specified in paragraph 3.1., they shall have no effect if in the meantime Comunello has accepted the order or has implemented it in part; in any event, Comunello reserves the right to cancel the original purchase order and to suspend performance of the current one, requesting damages.

3.4 The Product delivery date specified in the purchase orders is always indicative and any delay of up to 30 days with respect to such deadline shall never constitute grounds for the CUSTOMER to claim damages against Comunello or to terminate the contractual relationship.

More specifically, Comunello reserves the right to extend the delivery date due to unforeseeable circumstances or force majeure or in any case for circumstances that could not be foreseen at the time of the sale (for example, difficulty in procurement of raw materials and components); if prior to delivery, the CUSTOMER is in a difficult financial situation or changes its legal form, Comunello shall be entitled to suspend performance of, and possibly terminate the contract.

4. DELIVERY AND SHIPPING

4.1 The Products are delivered to the Customer at the production site or at the registered office of Comunello (hereinafter "Delivery").

4.2 If the Products are delivered Ex-works Rosà or Cassola (VI) Incoterms 2020, the risk is transferred upon delivery of the Products by FRATELLI COMUNELLO SPA to the Customer or to the carrier, the CUSTOMER being in charge of the transportation costs.

4.3 Unless otherwise agreed, FRATELLI COMUNELLO SPA shall establish, in the name and on behalf of the Customer, the type of shipment, the transport route and the carrier.

4.4 FRATELLI COMUNELLO SPA reserves the right to partially fulfil the purchase order or to partially deliver the products ordered. The Customer cannot raise any objection with regard to partial deliveries

and/or deliveries made by instalments. All Partial deliveries shall be invoiced individually and the payment time limits shall run from the date of each invoice. The payment of partial Deliveries may not be deferred until completion of all the Deliveries related to the original purchase order. The provisions of Article 4.1 shall also apply to partial deliveries.

5. PRICES AND PRICE LISTS

5.1 The price is as specified in the last Comunello price list for the products delivered to the Customer, including normal packaging and excluding shipping costs (hereinafter the "Price"). The last price list issued by FRATELLI COMUNELLO SPA cancels all previous price lists and, unless otherwise agreed, it shall be applicable to the sale.

6. PAYMENT

6.1 Payment of the Price has to be made within the time limit agreed between the contracting parties. Failure to pay the price within the agreed time limit shall result in the application of interest for late payment in commercial transactions, to the extent provided by Legislative Decree No. 231 of 9.10.2002 as amended and supplemented. Default interest shall run from the expiry of the payment due date, subject to COMUNELLO's right to seek compensation for any further damage.

6.2 The Customer may not make claims or raise objections against Comunello until the Price has been paid.

6.3 In the event of irregular payments, Comunello reserves the right to suspend the performance of all purchase orders, including those not affected by the delay or default by the CUSTOMER, without notice and with no right to compensation for the CUSTOMER.

7. RETURNS AND COMPLAINTS

7.1 Any complaints referring to either the quantity or the quality of the delivered Products must be made in writing within 8 (eight) days from receipt of the Products.

7.2 The Products returned shall be accepted by FRATELLI COMUNELLO SPA only after written agreement and exclusively with regard to new Products with their original packaging.

7.3 The Products must be returned using the appropriate transport document specifying the written permission of FRATELLI COMUNELLO SPA as well as the quantity and quality of the Products.

7.4 Returns shall not be considered accepted by FRATELLI COMUNELLO SPA unless they are returned in the manner specified above and, specifically, taking delivery of the Products at the headquarters or at the warehouses of FRATELLI COMUNELLO SPA may not be construed as acceptance of the returns.

7.5 The amount credited for returns not due to causes attributable to FRATELLI COMUNELLO SPA, shall be subject to a 30% deduction, to be regarded as a flat-rate assessment of the damage (penalty clause), charged to the Customer on account of the general, shipping, goods deterioration, age etc. costs incurred by COMUNELLO.

8. WARRANTY

8.1 In business relationships or in case of products sold for professional use, this warranty is limited to the repair or replacement of product parts that FRATELLI COMUNELLO SPA acknowledges as defective, through equivalent re-manufactured Products (the "Conventional Warranty"); the warranty does not include the costs necessary for repairing or replacing the material (e.g. labour costs, rental of equipment etc). -

8.2 The provisions contained in articles 1490 to 1495 of the Italian Civil Code shall not apply.

8.3 FRATELLI COMUNELLO SPA warrants the proper operation of the products within the limits indicated in 8.1 above. Unless otherwise agreed, the validity of the Conventional Warranty is 24 (twenty four) months from the production date, which can be found on the products. For actuators of the Showin line the warranty is 60 (sixty) months from the production date, while for the remaining products of the Automation Frame Line the warranty is 36 (thirty six) months from the production date. The Warranty shall be effective and binding on COMUNELLO only if the product has been correctly installed and maintained in accordance with the installation and safety rules set out in the documentation provided by COMUNELLO or otherwise available on the website www.comunello.com

8.4 The warranty does not cover: failures or damage caused by transport; failures or damage caused by defects in the electrical system of the buyer and/or by carelessness, negligence, inadequate or abnormal use of such system; failure or damage due to tampering carried out by unauthorized personnel or due to incorrect use / installation (in this regard, system maintenance at least every six months is recommended) or the use of non-original spare parts; defects caused by chemical agents and/or atmospheric phenomena. The warranty does not cover the cost

of consumables; in any event, COMUNELLO shall be entitled to a consideration for the work performed at the Customer, where such work proves useless as the warranty did not apply or because the customer had used the Comunello product in a negligent, reckless or incompetent manner, such that the proper use of the product could have avoided the work.

8.5 Implementation terms: unless otherwise agreed, the right to the Conventional Warranty is exercised by showing a copy of the purchase document (invoice) to COMUNELLO. Any defect must be notified to COMUNELLO within the time limit of thirty (30) days from detection of the defect.

The action must be exercised within the limitation period of 6 (six) months from detection of the defect. The Product parts for which the Customer requests application of the Conventional Warranty must be returned by the Customer to FRATELLI COMUNELLO SPA, Via Cassola 64, 36027 Rosà (VI) Italy.

8.6 The Customer cannot claim compensation for indirect damage, loss of profits, loss of production and in any case it cannot claim compensation for an amount that exceeds the value of the supplied components or products. All transport costs for Products that have been repaired or to be repaired, although covered by the Conventional Warranty, shall be charged to the Customer.

8.7 No external work carried out by Comunello technical staff is covered by the Conventional Warranty.

8.8 Specific amendments to the Conventional Warranty conditions described herein can be defined by the parties in their commercial contracts.

9. REPAIRS AFTER EXPIRATION OF THE WARRANTY

9.1 The Product repairs requested by the Customer shall be carried out by FRATELLI COMUNELLO SPA, subject to prior agreement on the cost of the work. In any case, labour and transport costs (return) shall be charged to the customer.

10. RESERVATION OF TITLE

10.1 The Products delivered to the CUSTOMER shall continue to be the property of FRATELLI COMUNELLO SPA until full payment of the Price by the Customer, regardless of who has possession of the Products. Transport costs and other costs necessary to recover the Products as well as extraordinary expenses and those that can be recovered, shall be charged to the Customer.

11. PATENTS, TRADEMARKS AND DISTINCTIVE MARKS

11.1 The Customer is aware that the Products are covered by patents and incorporate know-how and design that are the exclusive property of FRATELLI COMUNELLO SPA, pursuant to the Italian Industrial Property Code.

11.2 The Customer is expressly forbidden from infringing such FRATELLI COMUNELLO SPA's rights; in any case, the Customer may not in any way remove, delete or otherwise alter the trademarks or other signs or distinctive marks of any kind affixed to Products; the Customer is likewise forbidden from affixing new ones of any kind. Any form of reproduction or use of the FRATELLI COMUNELLO SPA trademark and of any other distinctive mark on the Products is forbidden, without written authorization by FRATELLI COMUNELLO SPA.

12. EXPRESS TERMINATION CLAUSE

12.1 Pursuant to article 1456 of the Italian Civil Code, any delay of more than ten days in the payment, or any non-payment of the Price, including partial, by the Client, as provided for in Article 6 of these General Terms and Conditions of Sale, shall result in termination of the purchase contract and FRATELLI COMUNELLO SPA shall be entitled to seek compensation from the Customer for the damage suffered, in addition to restitution of the Products not paid by the Customer.

12.2 The notice referred to in the previous paragraph shall be sent by registered mail with return receipt or via certified email address (Pec).

13. AGREEMENT BETWEEN THE PARTIES

13.1 Any agreements, existing or that will take place between FRATELLI COMUNELLO SPA and the Customer, in relation to returns and payment methods, shall prevail over the provisions of these General Terms and Conditions of Sale.

14. APPLICABLE LAW AND JURISDICTION

14.1 The purchase contracts entered into in accordance with the General Terms and Conditions of Sale are subject to Italian law only, with the exclusion of any other legislation.

14.2 All disputes that may arise on the mentioned purchase contracts shall be subject to Italian jurisdiction and referred to the exclusive competence of the Court of Vicenza, including if the agreed payment method is by bank collection order or draft payable at the customer's. (Italy). The content of this catalogue is subject to change at any time and without notice by FRATELLI COMUNELLO SPA.
