NUOVI CARDINI COMUNELLO

Ancora più facili da regolare!

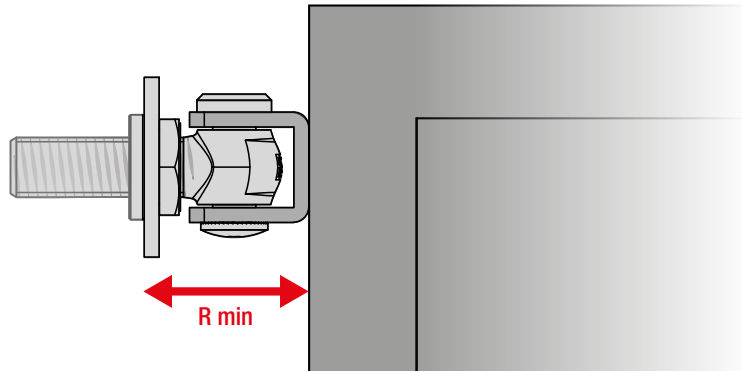

Nuovo design
Nuove funzionalità

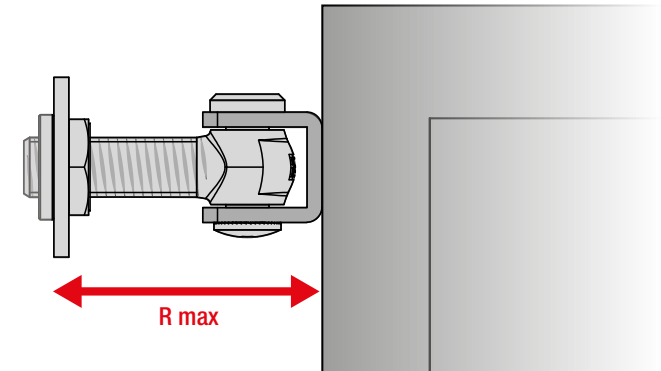

COMUNELLO
GATE DIVISION

01 Nuovo design e più ampio range di regolazione:

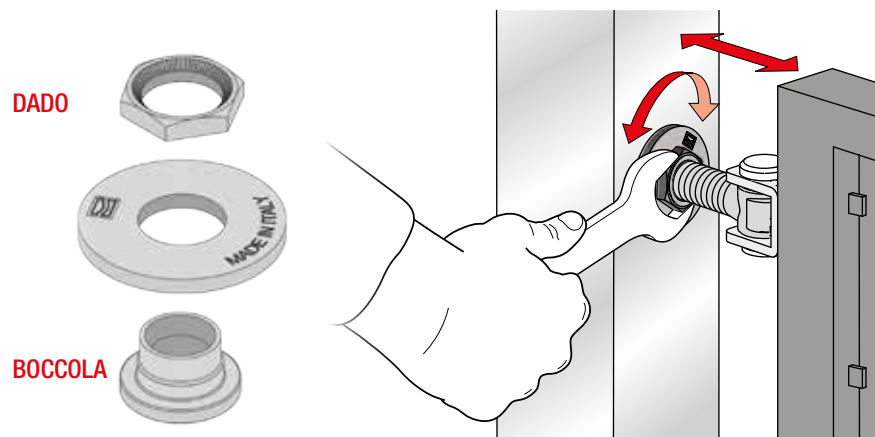

Grazie al nuovo anello a saldare è possibile ridurre la distanza tra anta e pilastro (R min).

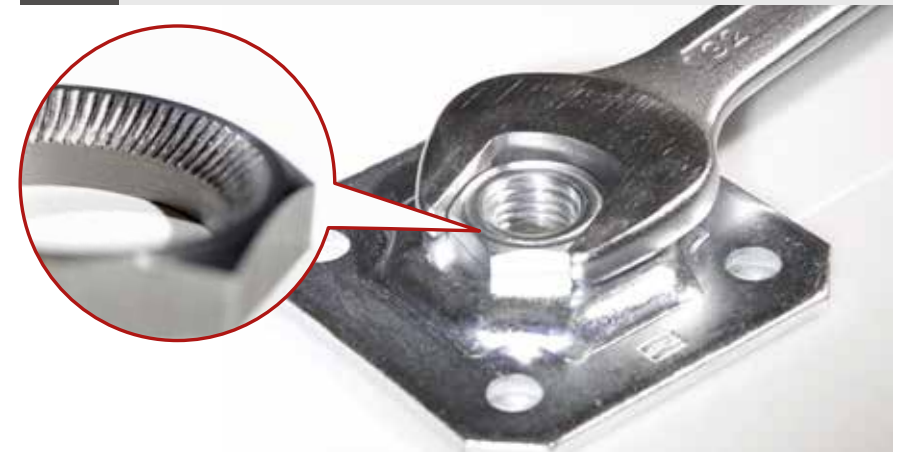

La maggiore lunghezza del perno permette di aumentare la distanza tra anta e pilastro (R max). Sviluppo disponibile entro fine 2017.

02 Regolazione piu' agevole:

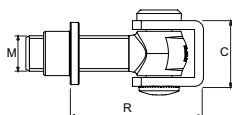

Il nuovo sistema di imbroccatura del dado sulla boccola, permette di regolare il cardine con estrema facilità **a cancello installato**.

03 Ottimale presa sulla piastra:

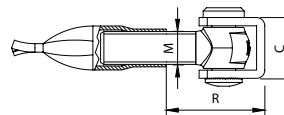

La **zigrinatura** opportunamente creata sul dado, assicura una presa ottimale tra boccola e dado, sia nei cardini a saldare che nei cardini a fissare
